Pearll Insights

A Wildcat Rewards pilot that proves the offer works in six weeks

Pearll Insights for Jordan Ellis, VP of Card Growth, Bear Down Bank

97

eligible customers in Texas, Colorado, Nevada, Utah and New Mexico

Prepared for Data Visualization, University of Arizona. Course scenario using a provided dataset.

Pearll Insights

Only 407 of your 2,000 customers can receive the Wildcat offer, and they are scattered nationwide

2,000
customers in your extract

743
hold no Bear Down credit card (37.15%)

495
of those have a FICO score of 670 or higher

407
of those also have a debt to income ratio below 2.0 (20.35% of all customers)

Eligible customers appear in 49 of the 51 states and districts in your data. Outside the five Southwest states, the typical state has 4.5 of them and the most is 34, in California.

Pearll Insights

We would answer three questions with your own data before any mail goes out

1

Who qualifies?

Check every customer against all 5,802 cards: no Bear Down credit card, a FICO score of 670 or higher, and a debt to income ratio below 2.0.

2

Where are they concentrated?

Compare the share of customers eligible by state, with counts shown so a rate resting on a few customers is easy to spot.

3

Would the result hold elsewhere?

Compare the pilot group with eligible customers in other states, so a good result is not mistaken for a local one.

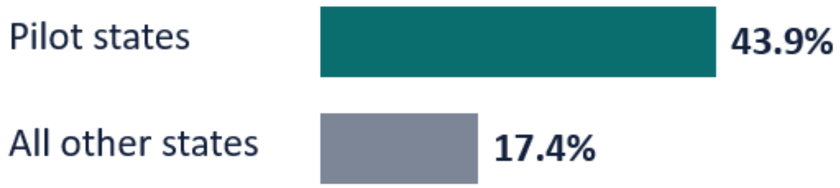

Data: your customer and card extracts as of September 30, 2026. What you see: a pilot mailing list in week 2 and a response report in week 6.

Pearll Insights

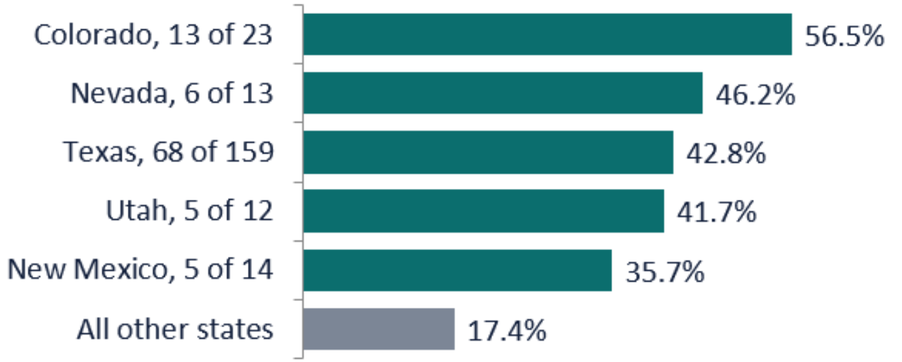

Our work sample finds 97 eligible customers in five Southwest states, 44% of the customers there

From our work sample

97 of 221 customers in the five states qualify

From our state analysis: share of customers eligible

Only 31% of customers in these five states hold a Bear Down credit card, against 67% elsewhere.

All 2,000 customers and 5,802 cards were analyzed. Counts are customers, not cards. Eligible means no Bear Down credit card, a FICO score of 670 or higher, and a debt to income ratio below 2.0.

Pearll Insights

A six week first phase turns the recommendation into a mailing list and a measured result

Weeks 1 and 2

Confirm the guardrails with Credit Risk and finalize the mailing list: 97 pilot customers plus a comparison group.

Weeks 3 and 4

Send the Wildcat Rewards offer to both groups.

Weeks 5 and 6

Track responses and report results for each group separately.

What you receive

A pilot mailing list, a response tracker, and a results report by group.

Why a comparison group

84 of the 97 eligible customers opened accounts in April 2021, the month of the Sagebrush Pay acquisition, so a good result could be specific to them. We add eligible customers elsewhere, such as the 34 in California, and report each group separately.

Pearll Insights

Approve a six week first phase to mail the pilot to 97 customers and measure the response

Approve

A six week first phase, starting once Credit Risk confirms the 670 FICO cutoff.

Scope

97 eligible customers in Texas, Colorado, Nevada, Utah and New Mexico, plus a comparison group of eligible customers elsewhere.

You receive

A pilot mailing list in week 2 and a results report in week 6.

Decision requested today: approve the six week first phase
